

HARSH GAHLOT

Software Engineer | Java · Spring Boot · Microservices | Applied AI (RAG · LLMs)
Chennai, India | +91 98994 71490 | harsh09gahlot@gmail.com | linkedin.com/in/h-gahlot

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience building and operating production-grade Java / Spring Boot microservices serving 6,000+ enterprise users across web and mobile. Hands-on with Kafka, RabbitMQ, PostgreSQL, Docker, and Jenkins CI/CD across a 20+ service platform; promoted with a performance bonus. Won 2nd place in a company-wide hackathon for a RAG-based AI knowledge assistant — strong across distributed backend engineering and applied AI / LLM systems.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, C++
Backend: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, Microservices Architecture, J2EE
AI / LLM: Retrieval-Augmented Generation (RAG), LangChain, Vector Search, Embeddings, Prompt Engineering
Databases: PostgreSQL, MySQL, Microsoft SQL Server, Oracle
Messaging: Apache Kafka, RabbitMQ, JMS
DevOps & Tools: Docker, Jenkins, CI/CD Pipelines, Git, Containerization
Frontend: React, Angular (working knowledge)
Practices: Agile/Scrum, Code Reviews, Secure API Design, Object-Oriented Design, Data Structures & Algorithms

PROFESSIONAL EXPERIENCE

Software Engineer, Mindsprint — Chennai, India April 2026 – Present

- Design and deliver backend features across 20+ Java / Spring Boot microservices serving 6,000+ enterprise users.
- Drive weekly Jenkins CI/CD deployments to lower environments and production releases on a 1–2 month cadence.

Junior Software Engineer, Mindsprint — Chennai, India July 2024 – March 2026

- Built and shipped 7+ production microservices in Java and Spring Boot powering enterprise web and mobile applications; promoted with a performance bonus for consistent delivery and end-to-end service ownership.
- Developed RESTful APIs with Spring MVC and Spring Data JPA, implementing robust validation, structured logging, and centralized exception handling across distributed services.
- Integrated Kafka and RabbitMQ for asynchronous inter-service communication, improving decoupling and throughput.
- Optimized PostgreSQL queries and data-access layers for high-volume workloads, improving large-dataset response times.
- Containerized services with Docker and maintained Jenkins CI/CD pipelines for repeatable, low-risk deployments.
- Collaborated in Agile/Scrum sprints — planning, code reviews, and technical documentation — with cross-functional teams.

Software Engineering Intern, Persistent Systems July 2023 – September 2023

- Developed backend components, automation utilities, and internal tools in Java and Python; contributed to testing, debugging, and technical documentation in an enterprise environment.

PROJECTS

RAG Knowledge Assistant — 2nd Place, Company-Wide Hackathon Python · LangChain · Vector Search · LLMs

- Built an end-to-end RAG pipeline — document ingestion, embeddings, vector retrieval, and LLM response generation — enabling employees to query internal documents in natural language.
- Indexed semi-structured enterprise datasets for accurate, context-aware answers, cutting manual knowledge-lookup effort.

Vehicle Location System (VLS) Java · Spring Boot · REST APIs

- Built services ingesting real-time GPS location data at scale; developed optimized retrieval and analytics APIs.

IRAF 2.0 — Enterprise Backend Platform Java · Spring Boot · PostgreSQL

- Built user-management and access-control modules with REST APIs, audit logging, and secure JPA persistence.

AGRIPAL — Farm Digitization Platform Java · Spring Boot · Angular

- Built backend services delivering weather insights and crop data; integrated third-party APIs for farmer-facing workflows.

ACHIEVEMENTS

- 2nd Place — Mindsprint company-wide hackathon, for a RAG-based AI knowledge assistant (vs. senior engineering teams).
- Performance bonus and promotion to Software Engineer within first two years at Mindsprint (April 2026).

EDUCATION

Bachelor of Engineering (B.E.), Computer Science — Chandigarh University · GPA: 8.02/10 2020 – 2024

Certifications: Data Structures & Algorithms (Python) · Database Management Systems (DBMS)
